

nSequence[®] Lite

**A Simplified Option for
Your Full Arch Restorations**

When immediate load may not be an option, nSequence Lite brings an easier, faster and more predictable solution.

- ✓ Reduction in surgical time.
- ✓ Idealized guided implant placement and bone reduction planning to accommodate for restorative space.
- ✓ Simplified restorative workflow with the Clear Duplicate Bridge, which functions as an all-in-one verification jig, bite block, set-up/try-in and final impression.
- ✓ Opens the door for many fixed removable options, including Locators, Hader Bar[®], Conus, etc.
